MechaTech Systems manufactures, supplies, and maintains S35 Gas Sampling Systems (Total Oxidation Units) for the nuclear power industry. The Drechsel Bottle Carrier, part number S35-80, is a useful accessory, designed for convenience and safety when transporting 250ml Dreschel bottles.

The purpose-built Drechsel bottle carrier with lid is specially designed to locate and accommodate 6 x 250ml Drechsel bottles with diffusers and associated tubes.

It is manufactured in brushed stainless steel with 4 x over centre clamps used to secure the lid to the carrier.

Plastic locator discs are fitted to the inside of the carrier to locate the bases of Drechsel bottles.

A silicone seal between the lid and the carrier provides added protection. A carrying handle adds extra convenience.

Each corner of the carrier has an exterior supporting foot.

Bottles not included (see S35 Spares List for bottles).
